Executive summary

Three reasons this offer reflects the market.

- 1. The market hasn't grown since the seller bought in 2021.** The Uxbridge median sold price in Aug 2021 (when 35 Jonathan transacted) was \$1.063M. Today (May 2026) it is \$972,000 — flat to slightly down over almost five years, and **−21% from the May 2022 peak**.
- 2. The list price has been tested by the market four times and rejected each time.** Between Sep 2025 and today the home has been listed for a cumulative 198 days across three consecutive listings (Terminated → Suspended → Active) without an executed offer. The market is telling the seller this home does not transact above \$1.0M.
- 3. The comparable sold record supports \$830k–\$900k for this specification.** Of the ten nearest recent detached sales in Uxbridge, four sold below \$900k and the lower quartile is roughly \$850k. Our \$880k offer sits above the bottom four of those ten sales — it is a fair, market-anchored price.

The framing: We are not trying to extract a discount. We are offering a number the comparable sales record genuinely supports. A sale at \$880k preserves a substantial portion of the seller's 2021 cost basis while reflecting four years of flat-to-declining market conditions.

Two consecutive terminations/suspensions at the current price band are the market's clearest possible signal: at this number, the home does not sell.

SALE OF BUYER'S HOME

Not conditional

CLOSING

Quick close offered

FINANCING CONDITION

Standard, time-limited

HOME INSPECTION

Standard, time-limited

In a market where many buyer offers are contingent on the sale of an existing home, our offer is **not**. The seller can plan with confidence that closing won't be held hostage by a third-party transaction. Combined with the offered quick close, the seller's path to liquidity is short and certain.

The ask

We are ready to formalize this offer immediately. The data above is intended to support a constructive conversation rather than to relitigate the listing strategy. We understand the seller's perspective, and we recognize they sit below their 2021 acquisition price in this scenario. Our position is simply that the comparable evidence does not support a higher number, and the 198 cumulative days at \$1.15M+ across three listings reflect the same conclusion.

We would welcome a counter at any number the seller believes is defensible against this comparable record.
